VP2050 is a two component gray direct to metal high build primer. VP2050 is fast drying and easy to sand and may be applied to over properly prepared steel, aluminum, fiberglass and existing coatings in good condition.

VP2050 is VOC compliant for National Rule refinish markets.

**Compatible Surfaces**

VP2050 DTM High Build Primer may be applied over the following.

- Fully cured, cleaned and sanded OEM and refinish paints, bare steel, aluminum and fiberglass substrates

**Compatible Topcoats**

- DELTRON® sealers
- GLOBAL REFINISH SYSTEM ® sealers
- ENVIROBASE® sealers
- VIBRANCE® topcoat system
- DBC Refinish Systems - Follow P-175 Deltro DBC recommendations for proper preparation
- BC Refinish Systems - Follow EU02 Global Refinish System BC recommendations for proper preparation
- *Envirobase* Refinish Systems - Follow EB-143 *Envirobase* High Performance Waterborne Basecoat recommendations for proper preparation

**Preparation**

- Wash the area to be painted with soap and water, then clean with an appropriate PPG wax and grease remover.
- Sand the bare metal areas completely with 80-180 grit abrasive. Sand old finishes with 320 - 400 grit dry by hand or machine or 600 grit wet.
- Re-clean with an appropriate PPG wax and grease remover.
- Prime aluminum substrate within 8 hours of sanding and cleaning.
- Prime carbon steel immediately after sanding and cleaning.

*Note: Custom or exotic finishes are excluded from coverage under the PPG Paint Performance Guarantee.*

*Product Information Effective 8/13*
DTM High Build Primer

Pot life: Pot life is 2 hours at 70°F (21°C)

Application:

Apply: Apply 1 - 4 medium wet coats allowing it to flash for 10 to 15 minutes between coats.

Film Build: 2 - 2.5 mils dry per coat

Note: Do not exceed 8 mils dry after sanding.

Spraygun Set up:

Air Pressure: 8 - 10 PSI at the cap for HVLP guns

Pressure: 29 - 40 PSI at the gun for compliant guns

Fluid Tip: 1.4 - 1.8 mm

Drying Times:

Between Coats: 10 - 15 minutes

70°F (21°C) Be sure the first coat has completely flashed before applying the second coats.

Dust Free: 70°F (21°C) 1 hour

Tack Free: 70°F (21°C) 4 - 6 hours

Tape Time: 70°F (21°C) 8 - 12 hours

Air Dry: 70°F (21°C) 16 - 24 hours / over night

Force Dry:* 140°F (60°C) Flash off for 15 minutes then 40 minutes @ 140°F (60°C)

IR (Infrared): Medium Wave N/A

Topcoat, Reccoat and Repair

Topcoat: 1 hour to 4 days @ 70°F (21°C)

Reccoat:

Air dry: 1 hour to 4 days @ 70°F (21°C)

Force dry: After cool down

Repair: 16 - 24 hours / over night or after force dry @ 140°F (60°C)

Body Filler may be applied over VP2050 after an over night air dry and a light sanding. If applying body filler, two coats of VP2050 must first be applied.

If preferred, VP2050 may be directly topcoated or sealed with a compatible PPG sealer.

VP2050 may be recoated without sanding up to 4 days. After 4 days, VP2050 must be lightly sanded and cleaned before top coating.

* Force dry time is quoted for metal temperature. Additional time must be allowed during force drying to allow metal to reach recommended metal temperature.

Important: The contents of this package must be blended with other components before the product can be used. Before opening the packages, be sure you understand the warning messages on the labels of all components, since the mixture will have the hazards of all its parts. Improper spray technique may result in a hazardous condition. Follow spray equipment manufacturer’s instructions to prevent personal injury or fire. Follow directions for respirator use. Wear eye and skin protection. Observe all applicable precautions.

See Material Safety Data Sheet and Labels for additional safety information and handling instructions.
