Value priced and color rich.

The value solution just expanded with the introduction of a dedicated chip tool chromatically sorted to quickly identify the best color for your next repair.

Now Available – the Value Color Deck provides a visual option to find the best color for the job. Chromatic color display opens endless possibilities of color choices independent of vehicle manufacturer. This tool offers 2100 large color chips and is updated yearly. Plus, the tool is sprayed with PPG Refinish paint which adds the value required for this growing segment.

PPG continues to be first to market with the latest vehicle information and continues to provide key information in both print and digital format.

Color Information books continue to provide the most current color information available for domestic and import vehicle production. Ideal for visual color identification and selection, the SIDEVIEW WINDOW™ feature provides the comparison needed to quickly determine the correct OEM code and color.

Paint It is a new approach to color identification and selection. Digital representations of the latest vehicle colors are available onscreen to assist in the color visualization process. Domestic and import manufacturers are now available in one location. The color family search feature provides a graphical view of specific exterior colors when an overall color is desired.
For the Repair technician, now an affordable solution to visual color assessment. The large chip size of the Value Tool and continuous color display make it easy to plaque the chip to the vehicle.

**Option 1.** For help in identifying the right color utilize the Color Information Books or Paint It.

**Option 2.** Online color, COLORMOBILE® or PAINTMANAGER® software applications will quickly identify the correct chromatic “chip” number.

**Option 3.** Select the correct chromatic deck and compare all colors in that family to determine the best chip that represents the vehicle color.

A visual check should be performed to verify the color before mixing and vehicle repair.

Contact your PPG Distributor for additional assistance in color selection using the RAPIDMATCH™ X-5 device.
